

Alao Muqadas Eyitope

Computer Science Undergraduate — Front-end Development & Software Engineering

Ibadan, Oyo-state, Nigeria | 07077146498 | personalmsg40@gmail.com |
<https://github.com/cyberbrolly>

PERSONAL STATEMENT / OBJECTIVE

Motivated Computer Science undergraduate at Ladoke Akintola University Of Technology, Brings hands-on experience building production-facing web applications, a strong foundation in modern JavaScript frameworks, and a keen interest in applying classroom knowledge to real-world engineering problems. Eager to contribute to a team while gaining practical industry exposure.

EDUCATION

Ladoke Akintola University Of Technology — B.Sc. Computer Science (in-view)2022 – 2028

Matriculation Number: 2022001978 Current Level: 200 Level

Relevant Coursework: Data Structures & Algorithms, Web Technologies, Software Engineering, Database Systems, Operating Systems

[Police Secondary School Ita-Ogbolu, Akure]2017 – 2022

National Business and Technical Examinations Board (SSCE)

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, C/C++, PHP, SQL
- Front-end: React, Next.js, Tailwind CSS, HTML/CSS
- Back-end & Tools: Node.js, Express, Flask, Git/GitHub, REST APIs
- Other: Linux (Kali/Mint/Ubuntu), WSL, XAMPP, MySQL

PROJECTS

Neural-Dash — Real-time social media monitoring dashboard for developers.[GitHub - cyberbrolly/Neural-Dash](https://github.com/cyberbrolly/Neural-Dash)

- Built using HTML, CSS, JavaScript, Python; Implemented web-sockets.

- Under Development

Threadline — *[Link/Repo]*

- Built using [tech stack]; implemented [key feature].
- Result or impact, e.g. deployed to production / used by X users.

EXPERIENCE

Front-end developer — **Eventinbox/forge***Active*

- Contributed to Eventinbox as the lead front-end developer, working with a team of 5.
- Achieved a perfect web-hook infrastructure delivery system.

Self-Directed Learning

- Full-stack Development - Progressed on HTML/CSS/JS through React, TypeScript and Next.js, and back-end fundamentals(Node.js, Express, Flask) via independent project-building
- Cybersecurity Fundamentals — Ongoing self-study covering reconnaissance (recon-ng) on Kali-Linux
